DETAILED ACTION

Claim Objections

Claim 22 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim 22 has not been further treated on the merits.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, drawn to an ink jet head.

Group II, claims 8, 13/8, 16/8, 17/16/8, 21/8 drawn to an ink jet head.

Group III, claims 9, 10, 11, 12/(10, 11), 13/9, 16/9, 17/16/9, 18/9, 21/9 drawn to an ink jet head.

Group IV, claims 14, 16/14, 17/16/14, 19/14, 20/14, 21/14 drawn to an ink jet head.

Group V, claims 15, 16/15, 17/16/15, 18/15, 19/15, 20/15, 21/15 drawn to an ink jet head.

NOTE: *Applicant should note that if any of Group II-V is elected, then applicant must rewrite the dependent claims of the elected Group to depend only to the claims of the elected Group so that no claim of the elected claims is read on the non-elected invention.*

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I lacks **at least** the technical features of a driver IC side portion of the head body being made of the same material as the driver IC as recited in Groups II and III and flip chip bonding as recited in Group III.

Group II lacks **at least** the technical features of flip chip bonding and body part recited in Group III.

Group III lacks **at least** the technical features of a driver IC side portion of the head body being made of material whose coefficient of linear expansion is substantially equal to that of the driver IC as recited in Groups IV and V.

Group IV lacks **at least** the technical feature of flip chip bonding as recited in Group V.

Groups IV and V lack **at least** the technical features the head body being made of the same material as the driver IC as recited in Groups II and III.

Please note that the list of technical features listed above is only examples. There are too many different technical features to list them all.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2861

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
